General Rating Guidelines:

Developmentally appropriate: based on what we know about the development and learning of children within a given age range, while also considering each child's individual abilities and needs, and his or her cultural background.

Children have chances: Chances are conversations, materials, equipment, or activities that allow for children to engage in a particular concept or area of development. Because "chances" is plural, at least 2 examples of chances in some/any combination must be observed to rate Yes.

Conflict: An active disagreement about opposing opinions or needs, accompanied by elevated emotions.

Play: Children's active engagement and enjoyment of an activity and their ability to determine how the activity is carried out.

Rating option No Opp: The assessor had no opportunity to rate this item during the observation. When "No Opp" does not appear as a rating option, the item should be observable during a one hour rating period.

Standard 1 – Relationships

1B: Building Positive Relationships between Teachers and Children.

1B.1	ITPKS	NEW ITE	M LANG	SUAGE 2022
